Laser thru-beam sensor

CNUS CE

Model Number

OBE1000-R3-SE2-0,2M-V31-L

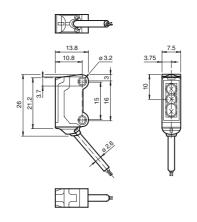

Laser thru-beam sensor with fixed cable and 4-pin, M8 connector

Features

- Ultra-small housing design ٠
- DuraBeam Laser Sensors durable ٠ and employable like an LED
- 45° cable outlet for maximum mounting freedom under extremely tight space constraints
- Improvement in machine availability ٠ with abrasion-resistant, antistatic glass front

Product information

The R3 series nano sensor has been developed for a broad range of applications. It offers excellent durability and is exceptionally easy to install. The housing is compact and, with its 45° cable outlet, can be installed in the smallest spaces. New functional principles and functionality open up a range of new options. The DuraBeam laser sensors are durable and can be used in the same way as a standard sensor. The abrasion-resistant lens allows long operating times close to the moving object.

Technical data			Laserlabel	
System components				
Emitter		OBE10M-R3-0,2M-V31-L		
Receiver		OBE1000-R3-E2-0,2M-V31-L		
General specifications			CLASS 1 LASER	
Effective detection range		0 1 m	PRODUCT	
Threshold detection range		1.5 m		
Light source		laser diode		
Light type Laser nominal ratings		modulated visible red light , 680 nm		
Note		LASER LIGHT , DO NOT STARE INTO BEAM		
Laser class		1	CLASS 1 LASER PRODUCT	
Wave length		680 nm	IEC 60825-1: 2007 certified.	
Beam divergence		> 5 mrad	Complies with 21 CFR	
Pulse length		approx. 2 µs	1040.10 and 1040.11 except for deviations pursuant to	
Repetition rate		approx. 16.6 kHz	Laser Notice No. 50, dated June 24, 2007	
max. pulse energy		9.5 nJ		
Diameter of the light spot		approx. 3 mm at a distance of 1000 mm		
Angle of divergence		approx. 0.5 °		
Optical face		frontal		
Ambient light limit	mote	EN 60947-5-2 : 30000 Lux	CLASS 1	
Functional safety related para MTTE.	meters	806 a	LASER PRODUCT	
MTTF _d Mission Time (T _M)		20 a		
Diagnostic Coverage (DC)		0%	IEC 60825-1: 2007 certified.	
Indicators/operating means			Complies with 21 CFR 1040.10 and 1040.11 except for deviations pursuant to	
Operation indicator		LED green, statically lit Power on , short-circuit : LED green	Laser Notice No. 50, dated June 24, 2007	
		flashing (approx. 4 Hz)		
Function indicator		Receiver: LED yellow, lights up when light beam is free, flashes when falling short of the stability control; OFF when light beam is interrupted		
Electrical specifications			Accessories	
Operating voltage	U _B	12 24 V	V31-WM-2M-PUR	
No-load supply current	I ₀	Emitter: ≤ 10 mA	Female cordset, M8, 4-pin, PUR cable	
Protection class		Receiver: ≤ 8 mA III	MH-R3-01	
		III		
Input Test input		Test of switching function at 0 V	Mounting aid for sensors from the R3	
Switching threshold		Teach-In input	series, mounting bracket	
Output			MH-R3-02	
Switching type		NO contact	Mounting aid for sensors from the R3	
Signal output		1 PNP output, short-circuit protected, reverse polarity protected, open collector	series, mounting bracket	
Switching voltage		max. 30 V DC	MH-R3-03	
Switching current		max. 50 mA , resistive load	Mounting aid for sensors from the R3	
Voltage drop	U _d	≤ 1.5 V DC	series, mounting bracket	
Switching frequency	f	approx. 2 kHz	MH-R3-04	
Response time		250 μs	Mounting aid for sensors from the R3	
Directive conformity			series, mounting bracket	
Electromagnetic compatibility Directive 2014/30/EU		EN 60947-5-2:2007 EN 60947-5-2/A1:2012	Series, mounting bracket	
		EN 00947-5-2.2007 EN 00947-5-2/A1.2012	Other suitable accessories can be found	
Standard conformity Standards		EN 60947-5-2:2007 EN 60947-5-2/A1:2012 EN 60825-1:2007 UL 60947-5-2: 2014	www.pepperl-fuchs.com	
Ambient conditions				
Ambient temperature		-20 60 °C (-4 140 °F)		
Storage temperature		-30 70 °C (-22 158 °F)		
Mechanical specifications				
Housing width		7.5 mm		
Housing height		26 mm		
Housing depth		13.8 mm		
Degree of protection		IP67		
Connection		200 mm fixed cable with 4-pin, M8x1 connector		
Material Housing		PC/ABS and TPU		
Optical face		glass		
Cable		PUR		
Mass		approx. 10 g Per sensor		
Cable length		200 mm		
Approvals and certificates				
UL approval		E87056 , cULus Recognized, Class 2 Power Source		
CCC approval		CCC approval / marking not required for products rated <36 V

CCC approval

FDA approval

IEC 60825-1:2007 Complies with 21 CFR 1040.10 and 1040.11 except for deviations pursuant to Laser Notice No. 50, dated June 24, 2007

Curves/Diagrams

Teach-In Methods

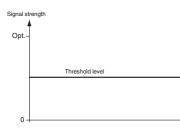

The thru-beam sensor enables the switching points to be taught in for optimum adaptation to specific applications. This eliminates the need for additional components such as apertures.

The sensitivity of the thru-beam sensor can be adjusted using three Teach-in methods:

Position Teach

When using this Teach-in method, the following settings are made on the thru-beam sensor:

- The gain is set to an optimum value
- The signal threshold is set to a minimum

Recommended application:

This method enables minuscule particles in the beam path to be detected, and provides exceptional positioning accuracy. Make sure that there are no objects in the beam path and that the sensor is connected to the power supply.

- 1. Connect the white cable on the receiver (WH/IN) to the blue cable (BU/0 V) on the receiver.
- The green and yellow LED indicators flash simultaneously at 2.5 Hz
- 2. Disconnect the white cable on the receiver (WH/IN) from the blue cable (BU/0 V) on the receiver. The green and yellow LED indicators flash alternately at 2.5 Hz
- 3. The end of the Teach-in process is indicated when the green LED indicator lights up static and yellow LED blinks.

Two-Point Teach-In

When using this Teach-in method, the following settings are made on the thru-beam sensor:

Refer to "General Notes Relating to Pepperl+Fuchs Product Information".							
Pepperl+Fuchs Group	USA: +1 330 486 0001	Germany: +49 621 776 1111	Singapore: +65 6779 9091	🖻 PE			
www.pepperl-fuchs.com	fa-info@us.pepperl-fuchs.com	fa-info@de.pepperl-fuchs.com	fa-info@sg.pepperl-fuchs.com				

- The gain is set to an optimum value
- The signal threshold is set in the center between the two taught signal values

Signal strength		
Max		
Teach-in value 1 (avg)	、 、	r (S
Threshold level	 Contrast levels 	
Teach-in value 2 (avg)		
0	→	

- 1. Make sure that there are no objects in the beam path and that the sensor is connected to the power supply.
- Connect the white cable on the receiver (WH/IN) to the blue cable (BU/0 V) on the receiver. The green and yellow LED indicators flash simultaneously at 2.5 Hz
- 3. Position the object in the beam path.
- Disconnect the white cable on the receiver (WH/IN) from the blue cable (BU/0 V) on the receiver. The green and yellow LED indicators flash alternately at 2.5 Hz
- 5. The end of the Teach-in process is indicated when the green LED indicator lights up static.

Maximum Teach-In

When using this Teach-in method, the following settings are made on the thru-beam sensor:

- The gain is set to a maximum
- The signal threshold is set to a minimum

Signal strength	
Max	
Threshold level	#2*
0	t

Recommended application:

Enables an object to be detected with a high excess gain. This can be useful if there is severe environmental contamination or to achieve long operating times.

Make sure that there are no objects in the beam path and that the sensor is connected to the power supply.

- 6. Cover the receiver or transmitter.
- Connect the white cable on the receiver (WH/IN) to the blue cable (BU/0 V) on the receiver. The green and yellow LED indicators flash simultaneously at 2.5 Hz
- Disconnect the white cable on the receiver (WH/IN) from the blue cable (BU/0 V) on the receiver. The green and yellow LED indicators flash alternately at 2.5 Hz
- The end of the Teach-in process is indicated when the green LED indicator lights up static.

Laser notice laser class 1

- The irradiation can lead to irritation especially in a dark environment. Do not point at people!
- Maintenance and repairs should only be carried out by authorized service personnel!
- Attach the device so that the warning is clearly visible and readable.
- The warning accompanies the device and should be attached in immediate proximity to the device.
- Caution Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.
