Retroreflective sensor

CE

Model Number

OBR50M-R300-2PP-V1

Retroreflective sensor with 4-pin, M12 x 1 connector

Features

- Pulse Ranging Technology (PRT) •
- Optimized for use with fixed reflectors
- Good alignability due to red . transmission LED
- Reliable detection of reflecting metall objects
- Simple operation with only one **TEACH-IN** button

Product information

The sensors in the R300 series represent a versatile product line and adopt various functional principles. All sensors operate using proven Pulse Ranging Technology (PRT) and are characterized by high sensing ranges and detection ranges. Contained within the compact housing of the 28 series of light barriers, the R300 offers all of the properties of PRT such as maximum reliability when detecting objects and immunity against ambient light and cross-talk. To achieve this, the sensors in the R300 series make use of a number of different kinds of measurement data. What's more, the sensors are equipped with red light that is safe for the human eye as standard, making it easier to align the devices, even across expansive work areas. These features, combined with an innovative and intuitive operating concept, provide solutions for conventional automation tasks delivering the highest level of performance.

Technical data			Accessories	
General specifications			ОМН-05	
Effective detection range		0 50 m	Mounting aid for round steel ø 12 mm or sheet 1.5 mm 3 mm	
Reflector distance		0.2 50 m		
Reference target		3 x REF-H100		
Light source		LED	OMH-07-01	
Light type		modulated visible red light	Mounting aid for round steel ø 12 mm or	
Angle deviation		exempt group	sheet 1.5 mm 3 mm	
Measuring method		Pulse Banging Technology (PBT)	OMH-21	
Diameter of the light spot		approx 16 cm x 18 cm at a distance of 10 m	Mounting brooket	
Ambient light limit			Mounting bracket	
Window width		100 mm	OMH-22 Mounting bracket	
Functional safety related parameters				
MTTE-		100 a		
Mission Time (T _M)		10 a	OMH-VDM28-01	
Diagnostic Coverage (DC)		0 %	Metal enclosure for inserting protective	
Indicators/operating means			panes or apertures	
Operation indicator LED green				
Function indicator		2 LEDs yellow for switching state	Mounting and fine adjustment device for	
Control elements		Teach-In key		
Electrical specifications			sensors from the 28 series	
Operating voltage	UB	10 30 V DC	OMH-RLK29-HW	
Ripple		10 % within the supply tolerance	Mounting bracket for rear wall mounting	
No-load supply current	I ₀	≤ 80 mA / 24 V DC		
Time delay before availability	t _v	$<0.7\ s$, for temperatures $<\!\!30^\circ C$ compliance of the specification 5 mins after power on	OMH-K01 dove tail mounting clamp	
Output				
Switching type		Q - Pin4: NPN normally open / dark-on, PNP normally closed / light-on	OMH-K03 dove tail mounting clamp	
		dark-on	V1-G-2M-PUR	
Signal output		2 push-pull (4 in 1) outputs, short-circuit protected, reverse polarity protected	V1-W-2M-PIIR	
Switching voltage		max. 30 V DC	Female cordset M12 4-nin PLIB cable	
Switching current		max. 100 mA		
Switching frequency	f	50 Hz	Other suitable accessories can be found at www.pepperl-fuchs.com	
Response time		5 ms		
Conformity				
Product standard		EN 60947-5-2		
Ambient conditions				
Ambient temperature		-40 55 °C (-40 131 °F)		
Storage temperature		-40 70 °C (-40 158 °F)		
Mechanical specifications				
Housing width		25.8 mm		
Housing height		88 mm		
Housing depth		54.3 mm		
Degree of protection		IP67		
Connection		4-pin, M12 X 1 connector		
Housing		Plastia APS		
Ontical face				
Mass		90 a		
11100				
Approvals and certificates				
UL approval		E87056 , cULus Listed , class 2 power supply , type rating 1

Curves/Diagrams

Intended Use

Mounting instructions:

The sensor can be mounted directly by means of thru-holes or by using a fixing bracket or mounting clamp (not included in the scope of delivery). Ensure that the surface is level in order to prevent the housing from becoming distorted when the fittings are tightened. It is advisable to secure the nuts and screws to prevent the sensor from being misaligned.

Connection:

Connect the device as set out in the connection diagram.

Adjustment:

The green LED lights up when the operating voltage is applied. Adjust the sensor so that the light spot is on the center of the reflector. The yellow sensor LEDs light up.

Installation Note

A pressure equalization membrane is fitted on the sensor nameplate. When mounting, make sure that the pressure equalization membrane is not sealed off.

Operating Concept

Teach-in:

To ensure reliable functionality, save the position of the reflector by using the Teach-in procedure. Press the "TI" button (for approx. 2 s) until the yellow and green LEDs flash in phase. Teach-in begins once the "TI" button is released.

Successful Teach-in: Yellow and green LEDs flash alternately (2.5 Hz). After successful Teach-in, the output and LED change their status.

Unsuccessful Teach-in: Yellow and green LEDs flash alternately very quickly (8 Hz). After an unsuccessful Teach-in, the sensor continues to operate with the previous valid setting after the relevant visual fault signal is issued.

Every taught-in reflector position can be retaught (overwritten) by pressing the "TI" button again.

Deleting the Taught-in Reflector Position:

To delete a taught-in reflector position, press and hold the "TI" button for > 4 s until the yellow and green LEDs go out. Release the "TI" button. The saved reflector position is deleted. The yellow and green lights will flash alternately (2.5 Hz) to confirm that the deletion has occurred.
