# **Retroreflective sensor**

# **Model Number**

# RLK91-6-IR/31/59/115

Retroreflective sensor with 5 m fixed cable

## **Features**

CE

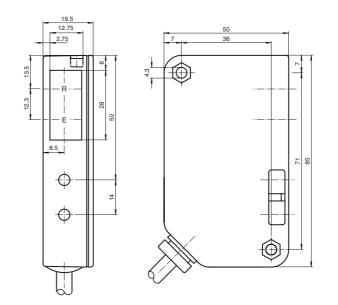

- Retroreflective sensor for single-• beam closing edge protection
- Narrow housing suitable for small ٠ gaps
- Sturdy plastic housing .
- Various possibilities for mounting •
- Version with infrared light .
- Version with AC/DC power supply •

# **Product information**

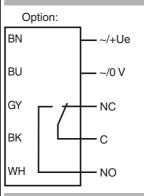

Concentration on the essentials is the hallmark of the 91 series. As ac/dc supply devices, these economical, reliable and easy-to-use photoelectric sensors can be used almost universally. Their narrow design means that they can be used in any environment.

The single-beam photoelectric sensors of the 91 series are suitable for closing-edge monitoring for elevators, barriers and doors, as well as for object detection and object tracking in material handling systems.

## **Operating principle**

The retroreflective sensor contains the transmitter and receiver in a single housing. The light from transmitter is beamed back from a reflector to the receiver. If an object interrupts the light beam the switching function is initiated.
