

VISC� CE c US

Model Number

ML4.2-8-H-40-RT/40b/110/115

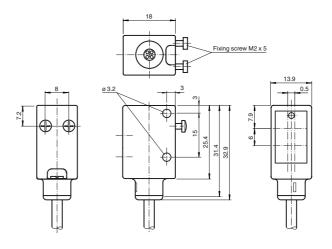

Background suppression sensor with 2 m fixed cable

Features

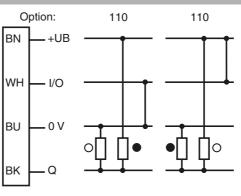

- Precise background suppression •
- Very small black-white difference
- Small, sharp light spot •
- Highly visible LEDs for Power-On, • switching status, short-circuit, and undervoltage
- Metal-reinforced fastening holes
- Tamper-proof version with no adjust-• ments
- Push-pull output

Product information

The ML4.2 series is characterized by a robust, powerful and standard design in a miniature housing. The housing offers IP67/ IP69K degree of protection, a scratch- and chemical-resistant lens, highly visible LEDs and robust all-metal bushings for mounting. Adjustable and tamper-proof sensors are available with a universal push-pull output and an electrical light ON/dark ON switch. The sensors have a high ambient light limit. Reflections from the background are suppressed. The unusually small, sharp light spot and the quick response time offer maximum switching precision on object edges.. Both red and infrared light sources are available. A high-performance fixed focus background suppressor is a useful feature. The sensors are suitable for precise object detection and open up a wide range of application fields.

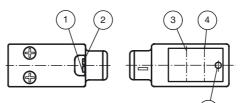

Electrical connection

O = Light on

= Dark on

Indicators/operating means

1	operating display green		
2	indication of the switching state	yellow	
3	receiver axis		
4	emitter axis
