# 2-D LiDAR Sensor

# OMD30M-R2000-B23-V1V1D-HD-1L

### **Model Number**

### OMD30M-R2000-B23-V1V1D-HD-1L

2-D LiDAR Sensor

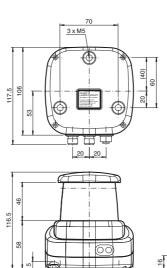

### with three M12 x 1 connectors

### **Features**

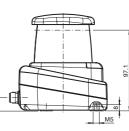

- High operating range •
- High angle resolution ٠
- Infrared light •
- Measuring method PRT (Pulse • Ranging Technology)
- Flexible measured data filter

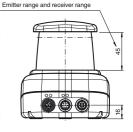

## **Product information**

Based on Pulse Ranging Technology (PRT), the sensor is powerful for measurements with a long range and a small light spot. The device scans its environment over the complete measuring angle of 360°. Due to the high scanning frequency, this sensor type is suitable for advanced applications. The device meets laser class 1 and is eye safe. Additional precautions to protect the operating personnel are not required. The interactive all-round display integrated in the optical surface can freely display individual texts and graphics. A wide range of accessories enables the sensor to be used in different applications. A PACTware device type manager (DTM) specially developed for this series offers extensive configuration and diagnostic options.

- Maintenance and repairs should only be carried out by authorized service personnel!
- Attach the device so that the warning is clearly visible and readable.
- Caution Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.
